Thank you and we look forward to having you attend!

3M Fall Protection Truck Demonstrations

Our fleet of specialized vehicles can bring on-site, hands-on fall protection demonstrations to your workforce. These demonstrations feature:

- Drop-tests using force measuring instruments so workers get a sense of the arresting forces they could experience during a fall.
- *'The ABC's of Fall Protection'*. An introduction to the basics of work at height safety:
  - **Anchorages** – are a secure point of attachment.
  - **Body Support** – Harness provides connection point on the worker and distributes the forces during a fall event.
  - **Connectors** – Lanyards or SRL's that connect the users harness to the anchorage.
  - **Decent and Rescue** – equipment used to raise and lower a fallen worker.
  - **Education** – its essential. We offer a variety of training to fit each customers need.
  - **Fall Protection for Tools** - improves workers safety by reducing dropped objects.

As industry leaders, we educate every day on the hazards of falls — because safety at heights isn't optional, it's essential.
See what it takes to work smarter, safer, and stay grounded.

Request an onsite demo at go.3M.com/FPTruckDemo or contact your local 3M Fall Specialist.
